**DETAILED ACTION**

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

**1. Claims 1-16 and 18-23 are allowed.**

5        These claims all require "a plurality of digital pulse width modulation (PWM) controller chips." As aptly noted by Applicant, *Kuo* does not disclose a plurality of "chips." (Applicant Arguments at 10, 11 March 2009.) The Examiner does not necessarily agree with Applicant's reasoning regarding a single package being evidence of a single chip. (*Id.*) However, the Examiner is persuaded upon review of *Kuo* that the  
10    reference is too vague in its terms to establish by a preponderance of the evidence that each H-bridge is an individual chip as that technical term is understood in the art of electrical engineering. Specifically, the Examiner construes the term "chip" in the special technical sense set forth by Applicant: a discrete chip taken off a silicon substrate. (*Id.*) Accordingly, the claimed invention requires a plurality of chips that are isolated from  
15    each other because they have different silicon substrates. *Kuo* only refers to each controller as within a single package without more. Thus, claims 1-16 and 18-23 are allowable over the cited prior art.

Applicant's makes several further arguments regarding the claims. (*Id.* at 11-13.) These arguments are unpersuasive, but the issues raised by those arguments are moot as  
20    *Kuo* fails to disclose the claimed "plurality of digital pulse width modulation (PWM) controller chips" for the foregoing reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
